- English
- Malayalam

## Certification

- Put AI to work with IBM watsonx workshop (2023)  
IBM INDIA PVT.LTD.
- Foundations of Cybersecurity (2024)  
Google

## Projects

- LPG Management System**  
The LPG Management System with gas leakage detection and gas usage analysis is a system designed to manage the distribution and usage of LPG gas in a safe and efficient manner. The system incorporates gas leakage detection sensors to detect any gas leakage in the supply chain and alert the system's administrator for prompt action. Additionally the system analyses gas usage patterns to provide insights into the consumption of LPG gas, which can be used to improve operational efficiency and reduce cost.
